Border-crossing and Host Nation Support Protocol for multinational Civil Protection Modules

Protocol encompasses border-crossing and transiting procedures specifically designed with the aim of enabling CP Modules to assemble at predesignated assembly points for further deployment.

The procedures shall be used in the following cases:

- **Offer** assistance in the form of multinational Civil Protection Module in a country that is a member of the module itself.
- Efficiently **receive** assistance in the form of multinational Civil Protection Module within the countries that compose a single module.

Border-crossing and Host Nation Support Protocol for multinational Civil Protection Modules

Each country has to designate a contact point in the national civil protection authority for facilitating border-crossing procedures and meet relevant host nation support requirements.

The Host Nation Support conditions will be agreed upon by the multinational Civil Protection Module's leading country.

Any international border-crossing point may be used as an entry point. On case by case basis, the national contact point will provide information on which border-crossing point shall be used, in order to make appropriate announcements and facilitate border crossing procedures.
