Assessment: FRMP

Beneficiary	
Albania	No systematic preparation of FRMP FRMP has been developed for the lower part of the Buna and Drini Rivers
Bosnia & Herzegovina	FRMPs will be drawn up in the next years.
Croatia	Completed at National level
the Former Yugoslav Republic of Macedonia	Existing initiatives: Prespa Lake and the Strumica River.
Kosovo*	Currently there are no properly defined FRMPs operating in the country
Montenegro	No systematic preparation of FRMP Contingency plan for flood management at National local level
Serbia	At early stage and coordinated with the International Commission for the Protection of the Danube River (ICPDR)
Turkey	FRMP in pilot basins

Though the elaboration of FRMP is included into Law 11/2012, only few pilot attempts of FRMP are currently present

There is not systematic elaboration of FRMP for each Unit of Management.

FRMP has been developed for the lower part of the Buna and Drini Rivers

As planned and clearly defined in the “Action plan for Flood Protection and Water Management in BiH 2014-2017”, FRMPs will be drawn up throughout BiH in the next years.

In compliance with EUFD, Croatian Waters has developed a National Flood Risk Management Plan

The National Flood Risk Management Plan is integrated with River Basin Management Plan

The FRMP lists the measures, each measure is linked with the competent institution responsible for its implementation.

The measures are described in general term and are not linked to a specific location.

Currently there are no properly defined FRMPs operating in the country

Each Municipality has a own emergency plan for all disasters.

*This designation is without prejudice to positions on status, and is in line with UNSCR 1244/1999 and the ICJ Opinion on the Kosovo Declaration of Independence.

The Water Strategy, the National Security Strategy, as well as the Law on Crisis Management are the founding documents of the flood management related activities.

The development of the detailed River Basin Management Plans, including flood management chapters, has not started yet.

There are, however, some already existing initiatives to be considered, for example on the Prespa Lake and the Strumica River.

The Law on Waters (OG MNE No., 27/07; No., 32/11; No. and 48/15) envisages the preparation of Flood Risks management Plans for areas which are at significant risks of flooding.

The plans will be prepared by the Water Directorate in accordance with the River Basin Management Plans, the General Plan for Protection against Harmful Effect of Waters (OG MNE 67/10, 33/14) and the Operational Plan for Protection against Harmful Effect of Waters.

National plan for protection and rescue and municipal plans for protection and rescue from floods represent the first step for the preparation of flood risk management plans.

FRMPs coordinated at the level of UoM are at an early stage.

FRMP are mostly developed as part of international initiatives such as the International Commission for the Protection of the Danube River (ICPDR).

The draft River Basin Management Plan for the Danube River Basin has been released for public review at the end of 2015. Within the environmental objectives and program of measures, the River Basin Management Plan also contains objectives of flood risk management.

Twinning Project “Capacity Building for the implementation of EU Flood Directive”, has increased the current capacity of Turkey in the preparation of Flood Risk Management Plans.

3 FRMP has been completed, 1 will be completed by June 2016 and 2 are started in December 2015.

The National Flood Directive Implementation Plan Envisaged that Flood Management Plans will be finalized till 2021.

Recommendations

- Beneficiary Specific
- Early Warning System and the link between warning and emergency management, Standard Operating Procedures
- Training and capacity building on Cost Benefit analysis, Multi Criteria Analysis, combination of structural and non-structural measures,
- Strength coordination among stakeholders, especially CP authorities and Water management authorities
- Strength existing hydro-meteorological services, define alert and warnings codes
- Coordinate FRMP with River basin management Plan and Emergency Plan

Thanks
